A Common Sense
Approach to
Genetic Excellence

- » **Sound, dependable, proven genetics**
Progressive, no-nonsense approach produces genetics that are deep, balanced and high quality—in large contemporary groups.
- » **Real-world data**
Fed cattle performance data, direct feedback from semen companies and documented results from clients to guide breeding decisions to what is making money in commercial production.
- » **Large numbers of ET and AI siblings for consistency**
- » **Wintering and delivery options**
- » **Feeder calf marketing**
Capture the added value of your TH-sired calf crop through a variety of Topp Herefords alliance programs. Multiple marketing options suited for your operation's needs:
- » **Conventional bids—forward contracts, retained ownership, spot pricing;**
- » **Verified natural/NHTC-forward contract, spot pricing.;**
- » **Buyer Support at sale barns and video auctions**
- » **Replacement-quality heifer solutions**
Premium pricing buy-back program for replacement quality F1 heifers sired by Topp Herefords bulls. In six years we have purchased back over 11,000 head of TH-sired replacement quality heifers.

Wintering Options and Insurance

We have three convenient wintering options:

1. Take your bull home sale day and receive \$100 off your purchase.
2. We will keep your bull(s) free of charge until April 1st, deliver them for free to central delivery points and will include a free semen evaluation prior to delivery.
3. If you are unable to take delivery sale day, OR by the time we deliver bulls to your area, we will keep your bull(s) for a fee of \$4/head/day until you can pick them up.

Buyer will have the option to insure their purchase(s) sale day. If buyer chooses not to insure their purchase and does not take their purchase(s) home, they must sign a waiver of liability on sale day.

Free Nation-wide Delivery

All bulls will be delivered to a central location. Topp Herefords will contact buyer prior to delivery to determine a central location.

Retained Interest

Topp Herefords will retain the right to utilize semen in herd on any lot in this sale. The interest retained will not affect your use or schedule.

Supplement Sheets

ADG, carcass data, current weights and WDAs will be available on sale day or can be downloaded online at ToppHerefords.com.

Phone Bids

If you would like to be on a direct line during the sale or place an absentee bid, please feel free to call the office or sales staff to review the bulls.

Online Bidding

See page 1 for details.

Cattle Viewing

The benefit of having the sale here at the ranch is the opportunity to view our cow families. Contact us to arrange a tour.

Terms of Sale

Each animal will be sold to the highest bidder and becomes the responsibility of the purchaser as soon as sold. The auctioneer will settle any disputes from the auction block. The cattle sell under the standard terms and conditions as recommended by the American Hereford Association.

Breeding Guarantee

Bull calves will be guaranteed breeders. If failing to be satisfactory, they must be reported to Topp Herefords by August 1, 2024. A replacement bull will be located at Topp Herefords or you can choose to receive 100% credit towards the purchase of a replacement bull in our next sale.

EPDs

All EPDs reflected are current as of catalog printing date.

Mortality Only Coverage

Coverage: Pays 100% of the value of the cow or bull in the event of death or humane destruction as a result of a life-threatening injury.

Term: 1/yr - Annual • **Indemnity:** Pays 100%, No Deductible

VOLUME XXIV BULL SALE

Fellow Cattlemen,

It is with great pleasure that we welcome you to our 24th Annual Bull Sale. What a blessing 2023 has been with abundant rain for many, a phenomenal feeder market and, with the exception of our October snowstorms, a record-setting mild winter to date. It is impressive to see so many cow herds still grazing pastures and corn stalks, with little to no feed being supplemented. Gains in the feedlots are outstanding to say the least.

Indeed, it is an optimal time to be in the cow-calf industry. With the market upswing it truly gives a person motivation to review future goals and fine-tune marketing plans. It has been rewarding to hear our bull customers express the value of marketing their cattle through TH Alliances with feedlots focused on white-face cattle.

The increased 2023 feeder pricing has also prompted larger swings in the market. Having the ability to contract at a known profit has extreme value to most. While it's difficult to pinpoint when the peak of the market will be, the ability to manage risk by choosing a contract price, and utilizing available marketing options, empowers producers to determine their profit vs. waiting to see what is handed to them on a given day.

The TH PITZ Heifer Development program continues to evolve into one of the premier sources for high-quality F1 bred heifers. Thank you to our bull customers for being diligent in producing a product that stands out in the industry, and for raising the bar by breeding some of the highest quality F1 cattle in the country.

This year's bull offering is a combination of our first cut yearlings, as well as our first cut 20-month-old bulls. As always, the bulls are backed by performance, carcass, and maternal traits that complement the nation's Angus cow herd. The extra pounds created by putting a Hereford bull on Angus cows is undeniable.

Plan to be with us at the Cattlemen's Banquet on Thursday evening February 8th, where we cover the TH marketing programs, followed by our 24th annual offering at 1 PM CST February 9th at the ranch.

Regards,

Ryan Topp

TOPP HEREFORDS

A COMMON SENSE APPROACH TO GENETIC EXCELLENCE

In today's world, cattle producers have more tools available than ever before to enhance the profitability of their operation. Theoretically, one can sort out their next herd bull while sitting in the comfort of their office in front of a computer. Genomic testing and EPDs are powerful tools that, used in the proper context, can enhance your final product. However, at Topp Herefords we feel that it is only a piece of a very simple puzzle that, at times, is made far too complex.

The cow herd at Topp Herefords is built on a foundation of four core values: udder quality, soundness, fertility and pounds. The structure by which we analyze these traits may be called old-fashioned by some. However, the process is real and exceptionally ruthless.

Udder quality is determined at calving time by a simple 1-2 rating system. A 1 is great and a 2 is cull. Soundness is determined during spring vaccination season. A female with a cracked foot, bad joints, poor disposition or hard-doing is sorted off and not even bred. Fertility sorts itself out quickly with a 45-day breeding season. Last but not least, pounds weaned. If they don't bring in a heavy calf, there is a pretty good chance she won't be calving here next spring.

Finally, genomics and EPDs enter the equation. These tools become very usable at this point in the selection process—after all our culling procedures have been processed. With the added accuracy of GE-EPDs, making decisions based on these numbers is valuable because you can be assured the animal has also passed the real tests of our cow herd's ability to produce profit.

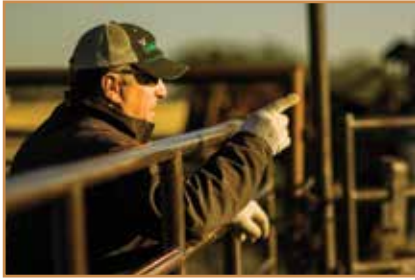

To ensure the quality and integrity of the ratios and EPDs, we put all of the year's calves together in the data set and the calves are separated at the AHA by age and sex. Not all programs are equal in this regard. When you choose Topp Herefords, you can rest assured you are getting what you pay for.

—Ryan Topp

We want to improve the profitability of your ranch
—Ryan Topp

Improving Your Profitability

Our primary purpose is to provide you a consistent source of premium Hereford genetics, but we take it a step further. We believe that a true Seedstock operation's responsibility is to develop genetics and systems that ultimately help drive the beef industry forward. Therefore, our success is measured largely by our contribution to the sustainability of our commercial cow-calf customers. We have been working diligently to create a multi-layer system that helps improve the health and profitability of your operation.

There is Power in Choice

There are proven strategies the generations before us have successfully utilized. Still, looking beyond the box that we are accustomed to can help us make optimal decisions. Having choices is transformative. By diversifying your portfolio you strengthen your position and create a marketing strategy customized for your particular operation.

Develop Your Financial Strategy

Cattle producers are used to gambling. We play the market, bet our livelihood on our ability to catch the market at its high, and then take what we get. But markets aren't always predictable. There are multiple tools available to help you manage risk, strengthen your marketing strategies and help improve your long-term financial effectiveness. Why ignore those?

There are no guarantees, but there are ways to improve your profitability long-term. As a Topp Herefords customer, we can help you diversify your marketing portfolio. This is your brand. This is your livelihood. There is power in choice. Let us help you capitalize on it.

MARKETING PROGRAMS FOR TOPP-SIRED CALVES

Feeder Calf Marketing Options

Through a variety of feeder programs, ranging from spot sales to forward contracting, we can help you capture the added value of your Topp Herefords-sired calf crop.

Baldy Heifer Calf Buyback Program

In partnership with Pitz Farms in Iowa, Topp Herefords buys back about 2500 head annually of first cut, replacement-quality open heifers from our bull clients and are developing relationships placing additional females into trusted programs.

Retained Ownership Opportunities

Retained ownership gives producers the opportunity to capitalize on the full potential of their calves. We are working to introduce our bull customers to the option of retaining ownership of their calves to the rail.

Crossbreeding Simplified

Maximize the number of TH-sired calves that qualify for the TH marketing programs with replacement quality, front end Angus-sired females bred to Topp Herefords bulls.

The logo for Topp Herefords, featuring the brand name in a stylized, cursive script font.

TOPP HEREFORDS

701.674.3152 // ToppHerefords.com

A COMMON SENSE APPROACH TO GENETIC EXCELLENCE

Selecting your bull battery is one of the most important decisions you make for your program. We get it—we have the same responsibility and understand what an impact this decision has on the future of your operation. With that in mind, we would like to share with you how we assess bulls and how we assess our herd.

The Fundamentals

First and foremost we look for soundness, depth and power, good feet, and good udders. It simply doesn't matter if an animal's ratios or EPDs are out of this world if the cattle are inefficient or lack structural soundness.

Ratios

We have utilized ratios as one of the biggest factors in determining how our females are mated or when selecting genetics to bring into our herd.

Ratios for both individual animal performance and performance of offspring over time are important. A performance ratio is the trait score for an individual animal within their contemporary group. We believe that contemporary groups should include as many calves as can be accurately compared so we don't break our calves into small contemporary groups. Birth weight, weaning weight and yearling weight for an individual animal are common examples of performance ratios.

A dam's production ratios are the average of the performance of her calves over time. For example, if a cow consistently produces calves that ratio below 100 on birth weight, but always ratio above 100 in weaning and yearling, that's sound predictability that we refuse to ignore.

We combine ratios with EPDs for a designed result that fosters predictability.

EPDs

EPDs allow us to compare the expected performance difference of progeny across herds and in different environments—providing a window into the potential genetic value of a bull or cow relative to the breed as a whole.

For non-parent animals, standard EPDs are statistical projections based on pedigree and individual performance in a registered herd. The accuracy of EPDs improve over time as the performance of progeny are added to the calculation.

Genomic-Enhanced EPDs

At Topp Herefords, we have been DNA testing since 2013. We DNA test to provide parent verification, identify genetic defect status, and increase the accuracy of EPDs.

GE-EPDs on virgin bulls increase the accuracy of EPDs substantially. By way of example, a bull with GE-EPDs has the same level of accuracy for the WW EPD as a bull with 12 recorded progeny.

Genetic Excellence

At Topp Herefords we bring all of the available tools together with experience, disciplined selection, and sound fundamentals to deliver you consistent, premium-quality Hereford genetics.

The sire group for cattlemen that still sell 'em by the pound. Without question, 105H is a breed changer for purebred or commercial producers that want to accelerate the #1 profit index of pounds weaned. 105H is massively constructed, with near perfect foot and joint structure, and his progeny consistently have more grow and overall mass than typical Hereford phenotype. 105H ranks in the top .05% for yearling weight, top 1% WW, top 10% milk, top .05% REA, and top 3% CHB. His accomplished Dam, 321E, is one of our lead donors and is fast becoming one of the must-see females on ranch tours. 321E has impressive progeny ratios of 94 BW, 104.8 WW, and 108.4 IMF.

Lot 1 represents two generations of proven donor females. 130L displays an incredible amount of power and mass in terms of rib shape and pure muscle. We talk about the importance of the basics at TH, and Lot 1 undoubtedly covers the making him one of the top legitimate herd bulls of his class. 130L ranks in the top 1% of the breed for WW and YW, while still ranking in the top 12% for marbling.

Another one of our favorites of his class. Typical of the 105H progeny is their explosive shape and overall performance. Lot 3 takes it all to the next level with a 119 WW ratio and actual 205-day weight of 782.

INNOVATION - Progeny

Full Brothers

—Lots 4 and 5—

This pair of full brothers intrigues us from the standpoint of mass, phenotype, and maternal greatness. Typical of the 105H progeny, they are just a little more of everything. Their standout Dam, 116F, made the donor pen last year. An impressive udder while still exhibiting a world of growth. Her lifetime ratios of 106 WW and 110.5 for marbling points to a blend of growth, carcass, and phenomenal maternal strength.

Lot 6 is a phenotype standout of his sire group. 253L also ranks in the elite amongst his contemporaries for growth with a 120 WW ratio, which is consistent with his Dam's lifetime ratio of 104.6 WW.

INNOVATION - Progeny

Full Brothers —Lots 8-10—

Lots 8, 9, and 10 stem from the consistent 512X, full sister to 719T and Dam of Playmaker 14Z. Their Dam, 425D, was the pick of Alex Cosgray as a bred heifer. After seeing her in production, we decided to buy a flush from her.

A new era pedigree at TH. TH purchased both his Dam and Granddam as the 2 top females to lead our LI program going back on homozygous-polled bulls. 3073 is massive from every angle. Lot 11's abilities as a power bull with phenotype, as well as a maternal powerhouse, will add a twist of excitement. 3073 will definitely be an AI sire used here at TH in 2024.

INNOVATION - Progeny

Full Brothers —Lots 28-32—

Where to start on these 5 full brothers backed by three generations of proven donors? Their exceptional Dam, 200E, is one of the nicest-ud-dered females in the TH donor pen, which is typical of the 49B progeny. Their Granddam, 512X, Dam of 49B, is a full sister to GENEX sire 719T and raised top-selling sire Playmaker 14Z. Their 3rd generation Dam, Dominette 122, produced multiple donor females, one of whom sold to Express Ranches and Sierra Ranches. These 5 full brothers will certainly earn their spot by adding pounds and consistency with a strong maternal boost.

121J is one of two Masterplan sons that, in our minds, was a logical choice to move on with from their very successful sire, TH Masterplan 183F. 121J progeny are like 183F progeny in terms of type and kind, with the addition of another outstandingly consistent maternal Dam, 116F. 116F displays impressive lifetime WW ratios of 106, and IMF ratios of 110.5. Look for 121J progeny to provide moderate birth, along with excellent performance, while still excelling in maternal traits. 121J's Dam is also the donor Dam of Innovation sons, Lots 4 and 5.

Lot 38 is a phenotype standout of his class with an abundance of performance. To date, 189L has posted impressive ratios of 95 BW and 108 WW. His exceptional young up and coming Dam is typical of the 71D daughters in production. A massive-bodied female with a near perfect udder compliments the bull's phenotype to create a most exciting prospect.

ECR Z311 MISS THOR 6082
 THR MISS THOR 4047B

0225 is the largest sire group of the 2024 offering. 0225 was originally purchased as an outcross sire that had the type we desire with a highly productive proven Dam. A true short-gestation sire that has worked phenomenally on mature females to moderate BW a bit, as well as working extremely well on heifers. His dam has continued to excel with lifetime ratios of 99.6 BW, 111.4 WW, 103.7 YW, 103.3 REA, and 113.3 IMF.

Recommended for use on heifers.

A heifer's first calf. 8L's pedigree is loaded with calving ease. Several generations of proven low-birthweight sires in this calf's pedigree ensures the predictability of a sure-shot heifer bull supreme. Couple that with his Dam finding the donor pen in her first outing. A phenomenal female with an excellent udder. 71J ratioed at 94 BW and 105 WW on her first calf. She also displayed impressive carcass ratios of 110 REA, 127 IMF. 8L will be heavily considered for AI use at TH in 2024.

VENTURE - Progeny

Full Brothers —Lots 81-82—

Without question, Lots 81 and 82 are out of the most popular donor on the ranch. 51E is the Dam of TH Crown Royal, which topped the 2021 sale, going to Four Taylors Livestock, Utah, Wooden Shoe Farms, Idaho, Harvest Herefords of Australia, and ANL Polled Herefords, Brooks Farms, Roselawn Herefords and Golden Oak Livestock, all of Canada. 51E also produced the popular Lot 1 of the 2022 sale selling to G4G in Oklahoma. Her natural heifer calf was the pick of the heifer calves in 2023 and went to Gustavo Camarena Franco, Mexico.

VENTURE - Progeny

Full Brothers —Lots 96-99—

These four full brothers stem from one of the most proven donors at TH, 176A. She exhibits impressive lifetime ratios of 105 WW, 102.3 YW, 107.5 REA, and 102 IMF. A balanced set of EPDs, coupled with explosive phenotype and above average performance, while still excelling in maternal excellence.

Our go-to outcross sire for the last several years. After seeing his first daughters in production, we decided to join several more matings to 195B to be born in 2024. His progeny are just made right. Super sound, big ribbed, and attractive. Needless to say, the right kind of udder type. Several of the top sellers the last four years have stemmed from this sire group. 195B boasts impressive ratios of 99.3 BW, 101.7 WW, 100.6 YW, and 105.5 IMF.

Topp Herefords Cattlemen's Banquet

Join us

**Chieftain Hotel &
Conference Center**
60 4th Avenue South
Carrington, ND 58421

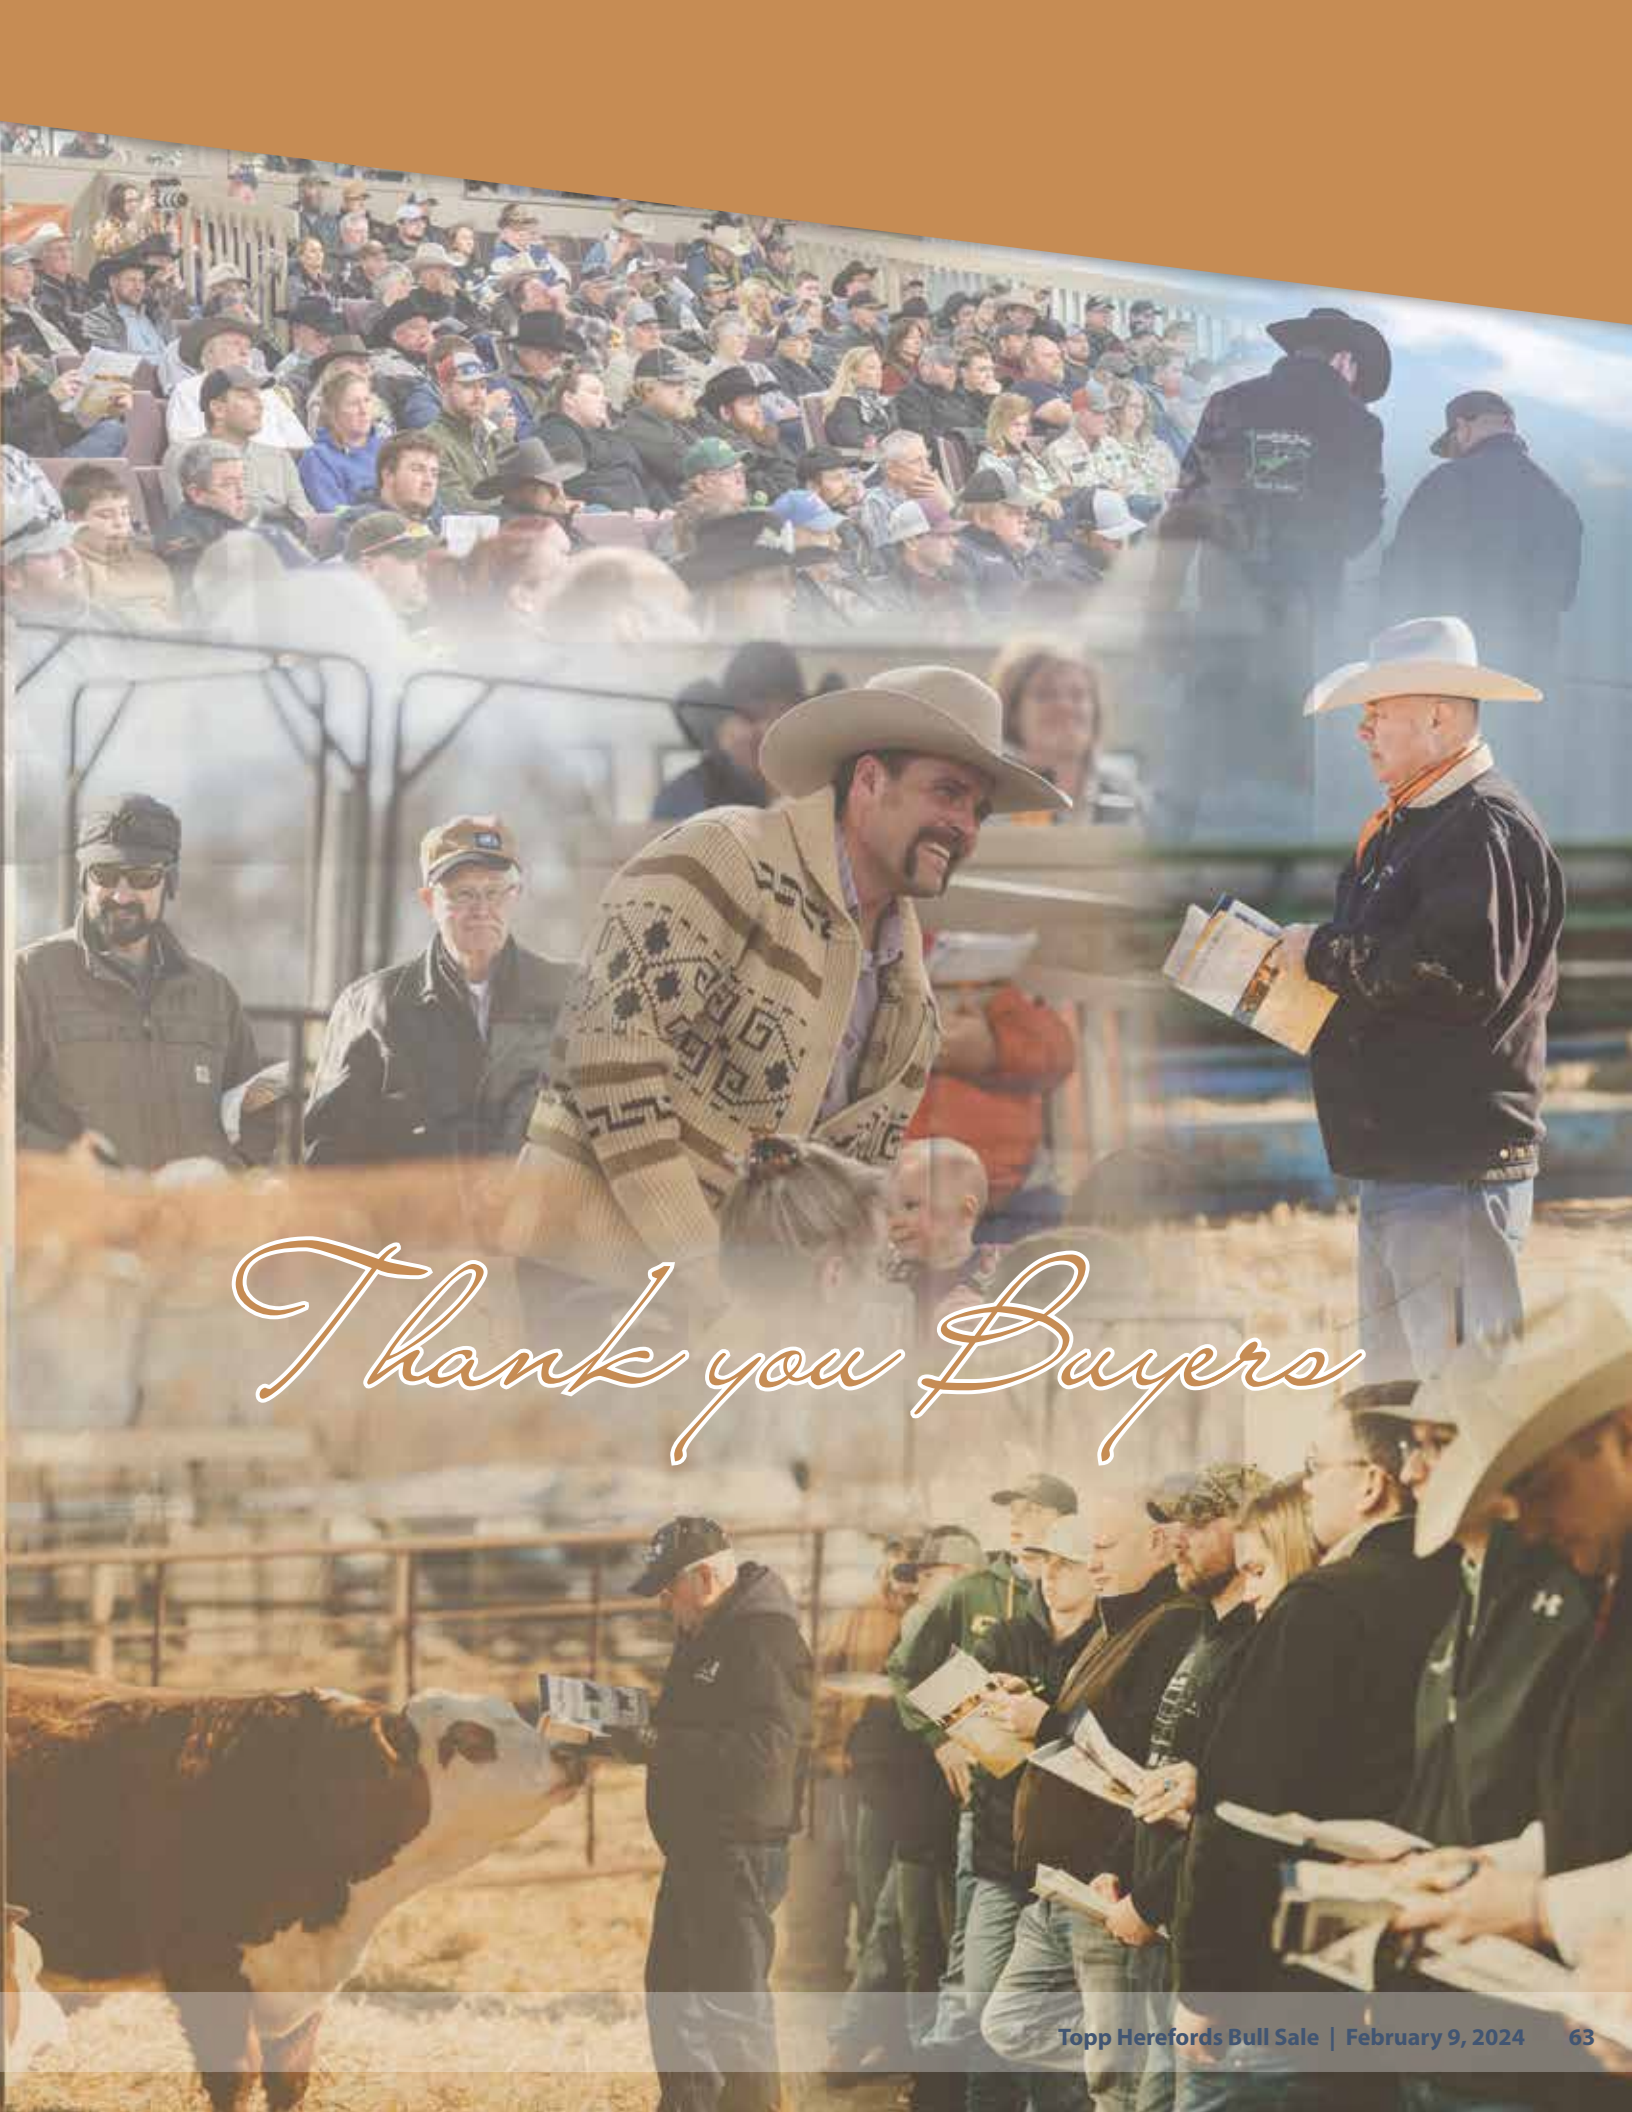

Thursday, February 8, 2024

5:00—Social
6:00—Complimentary Dinner
7:00—Marketing your cattle
with Topp Herefords

Join us for a round-table discussion and presentation on our value-added programs that will benefit your bottom line and aid you in marketing your TH-sired calves.

As each year passes the banquet is always top on our list of sale highlights as we get to connect with each of you. We hope you will join us.

Topp Herefords

Thank you Buyers

The Topp Herefords *Crew*

Thank you to Keith, Jordan and Dana for their steady and valued contribution. They are critical to the success of Topp Herefords!

A special thank you to Marlen Ehlers for his part time help.

TH INNOVATION 105H

—Sire of Lots 149-156—

Full Brothers —Lots 149-152—

A much-anticipated flush of two mega donors at TH, 533B and 321E. To rank these full brothers has been interesting as several astute cattlemen have consistently sorted out a different top individual. Their dam, 533B, who is also the dam of TH Big Country 537G, owned by Semex Beef in Canada, is the epitome of a true maternal matron. Beautifully uddered, super-wet, easy-fleshing, and breeds year after year. Her daughters in production are mirror images of her. 533B records lifetime ratios of 104.1 WW and 105 YW. Their sire, 105H, is our pure power sire. With the added bonus of his Dam, 321E, being ultra productive with high indexes across the board.

A phenomenal Innovation son that is supported by the Line One great, 3242A. 3242A probably puts as much rib shape and muscle into her progeny as any L1 female in the breed. Combine that with the mass of the 105H bull to create an exceptional product in this young prospect.

Full Brothers —Lots 157-159—

This trio of full brothers are a fresh outcross for TH. Their dam 321E, also the dam of TH Innovation 105H, displays notable ratios of 94.2 BW, 104.8 WW and 108.4 IMF. A blend of moderate birth, high growth, high maternal, and impressive carcass figures make this trio worth serious consideration.

Full Brothers —Lots 160-161—

Full brothers to TH Innovation 105H. This set of full brothers will write their own chapter next to their popular full brother that has worked so very well at TH. Their Dam, 321E, is ultra productive with high indexes across the board. Combining Innovation's consistent injection of growth and overall mass with the maternal performance of 321E ensures progeny with substantial genetic merit.

The image features a large group of two-year-old Hereford bulls in a pen, with a close-up of four bulls in the foreground. The background shows a large group of bulls in a pen, with a metal fence and a clear blue sky. The foreground shows four bulls with white faces and brown bodies, standing in a field of dry grass. The text "Two Year Old Bulls" is overlaid on the image in a brown serif font, with "Bulls" in a cursive script.

TH purchased an in-herd interest in 7327 after seeing him at Ashwood Cattle Company in Oklahoma in the fall of 2020. 7327 is massive in his structure yet holds a potent 6.7 CE and 2.4 BW. His Dam, 403A, also combines the legendary Lambeau 17Y to further compliment 7327 as a sure-shot heifer bull.

0225 is the largest sire group of the 2024 offering. 0225 was originally purchased as an outcross sire that had the type we desire with a highly productive proven Dam. A true short-gestation sire that has worked phenomenally on mature females to moderate BW a bit, as well as working extremely well on heifers. His dam has continued to excel with lifetime ratios of 99.6 BW, 111.4 WW, 103.7 YW, 103.3 REA, and 113.3 IMF.

Full Brothers —Lots 180-183—

A pedigree that reads certainty for maternal excellence. Their Dam is, undoubtedly, one of the most influential females at TH. 51E is the Dam of TH Crown Royal, which topped the 2021 sale, going to Four Taylors Livestock, Utah, Wooden Shoe Farms, Idaho, Harvest Herefords of Australia, and ANL Polled Herefords, Brooks Farms, Roselawn Herefords and Golden Oak Livestock, all of Canada. 51E also produced the popular Lot 1 of the 2022 sale selling to G4G in Oklahoma. Her natural heifer calf was the pick of the heifer calves in 2023 and went to Gustavo Camarena Franco, Mexico. 51E excels with lifetime ratios of 98.6 BW, 111.2 WW, and 106 WW. This set of full brothers balance an excellent EPD profile with phenotype, mass, and maternal excellence.

VENTURE - Progeny

Full Brothers

—Lots 184-185—

A stout-made pair of full brothers that have been a popular choice by many who have been through TH this year to tour the bulls. Reared by the ever-consistent A208, who is also the Dam of Great Plains (owned with Frederickson Ranch, SD, Dennis Birdsall, WY, Brooks Farms & ANL of Canada) and Select Sires / Monahan Cattle Co. purchase, TH El Dorado 57D. A208 inevitably brought in one of the very top calves year after year. We had the misfortune of losing A208 this past year, however her genetic influence will be sought after and harvested at TH for several generations.

183F has exceeded all our expectations. His progeny are born easy and are extremely vigorous at birth. That are short-necked, big-middled, and have a tremendous birth to weaning spread. Masterplan, progeny, like their Dam, are the easy-keeping kind. His first daughters are extremely gorgeous-uddered and after assessing his progeny past their first two breeding seasons, we are beyond confident in their ability to maintain flesh while working, with high accuracy. 183F puts together antagonistic traits with low birth while leading the breed in the top .05% in the entire Hereford population for YW. Moreover, he ranks in the top 2% for WW, top 5% for scrotal, and top 2% for IMF. We just cannot say enough about the Masterplan Progeny working in the real world.

657 is an outcross sire that has consistently produced a balance of moderate BW and above-average performance. Look for the 657 progeny to add eye appeal and mass to their calves. His progeny are noticeably vigorous at birth, while being short-marked and predominantly dark red. The 657 offspring are certainly the softer-made, looser-hidden cattle that just feed well and have been popular amongst commercial producers for the last several years.

The sire group for cattlemen that still sell 'em by the pound. Without question, 105H is a breed changer for purebred or commercial producers that want to accelerate the #1 profit index of pounds weaned. 105H is massively constructed, with near perfect foot and joint structure, and his progeny consistently have more grow and overall mass than typical Hereford phenotype. 105H ranks in the top .05% for yearling weight, top 1% WW, top 10% milk, top .05% REA, and top 3% CHB. His accomplished Dam, 321E, is one of our lead donors and is fast becoming one of the must-see females on ranch tours. 321E has impressive progeny ratios of 94 BW, 104.8 WW, and 108.4 IMF.

INNOVATION - Progeny

Full Brothers —Lots 220-222—

A much-anticipated flush of two mega donors at TH, 533B and 321E. To rank these full brothers has been interesting as several astute cattlemen have consistently sorted out a different top individual. Their dam, 533B, who is also the dam of TH Big Country 537G, owned by Semex Beef in Canada, is the epitome of a true maternal matron. Beautifully uddered, super-wet, easy-fleshing, and breeds year after year. Her daughters in production are mirror images of her. 533B records lifetime ratios of 104.1 WW and 105 YW. Their sire, 105H, is our pure power sire. With the added bonus of his Dam, 321E, being ultra productive with high indexes across the board.

TOPP HEREFORDS

BULL SALE

1 PM (CST) February 9, 2024

Sale Location

Topp Herefords
1157 83rd Ave NE
Grace City, ND 58445

Driving Directions & Times

From Jamestown, ND—1 Hour

Take Hwy. 281 North to Carrington. Turn east on Hwy. 200 to 81st Ave. NE, then north to Grace City. 1½ miles past Grace City turn east onto 11th Street NE. After 1 mile go north on 83rd Ave. NE at the Topp Herefords sign.

From Grand Forks, ND—2 Hours

Take I-29 S. to Thompson Exit #130. Go west through Thompson on ND-15 W until you reach Hwy. 20. Turn south to McHenry. Immediately south of McHenry turn west onto 11th St. N.E. At 83rd Ave. NE turn north at the Topp Herefords sign.

From Fargo, ND—2 ½ Hours

Head west on I-94 to Oriska Exit #302. Turn north onto ND-32 N. Continue north to Hwy. 200. Go west on Hwy. 200 until you reach Glenfield. Then turn north and continue on ND-20 N. until you reach McHenry. Immediately south of McHenry turn West onto 11th St. NE. At 83rd Ave. NE turn north at the Topp Herefords sign.

From Minot, ND—3 Hours

Take Hwy. 52 east to Fessenden. Turn east onto ND-15 E, then south onto US-281. Stay on US-281 until you reach the Barlow exit. Turn east onto 11th St. NE and continue east for 16 miles (part of the road will be gravel). Continue until you reach 83rd Ave. NE, turn north at the Topp Herefords sign.

Air Travel

Fargo, ND

Hector International Airport is served by Allegiant, American Airlines, Delta and United Airlines.

Jamestown, ND

Jamestown Regional Airport is served by United Airlines, with service provided by SkyWest. Features daily round-trip flights to Denver International Airport.

Bismarck, ND

Bismarck Municipal Airport is served by Allegiant, Delta and United Airlines.

Accommodations

Ask for the Topp Herefords rate and reserve by February 6.

Carrington Inn & Suites

101 4th Ave S, Carrington, ND 58421
 (701) 652-3982
